THE PERFECT SOLUTION FOR TROUBLESOME CONTAINERS THE POWERED ROLLER DECK OPTION

IDEAL-PAK® Powered Roller Deck

Eliminate slipping and tipping containers through your closer. The Powered Roller Deck features a heavy duty, corrosion resistant, low friction, abrasion resistant interlocking belt. The interlocking belt travels at the same speed as the conveyor below it, allowing containers to move through the closing zone effortlessly.

Due to the interlocking belt's hard, flat surface, pressure is more evenly distributed against the lids and container, along with the synchronous belt and conveyor speed, tipping is prevented.

The modular design of the Powered Roller Deck means that existing customers with any of our CEM line can upgrade from their standard roller closer. Contact an Ideal-Pak® sales representative to see how we can help you with your liquid filling and container closing needs at (800) 383-1128, or send an email at sales@ideal-pak.com.

FEATURES

- Closer Guards
- Heavy Duty Construction
- Corrosion Resistant, Low Friction, Abrasion Resistant Interlocking Belt
- Modular Design Fits in Existing Ideal-Pak® CEM Machines

ABOUT IDEAL-PAK®

Ideal-Pak Liquid Filling and Packaging Machines are designed to increase your yields, productivity and efficiency. Choose from Semi-Automatic to Automatic or Manual Configurations to fill and/or close containers from ½ pints to totes.

Choose Ideal-Pak for a wide variety of closing machines, lid placers and precision nozzles, plus parts and service, including Neupak.
