May be covered by one or more of the following  
U.S. Patents: #5,505,233, #5,823,406, #6,148,877, #6,595,250

The 23-PNP-G Gallon Normlock Placer has been redesigned. The star wheels have been eliminated and replaced by a chute. The Normlock ring is held in the chute at an angle to the conveyor. The ring is pulled on to the can as the can is conveyed in to the ring.

The placer needs to mount close enough to the closer assembly so the ring and can are under the rollers while the ring is still being pulled from the chute.
